

What Can RYAN SCIENTIFIC, INC. Do For You?

Sourcing Rare compounds from around the globe.

- Currently have over 250 suppliers internationally.
- Our product range consists of nearly four million screening items (HTS) and 100K building block compounds. We have all these items on a searchable DVD.
- Many items your research requires are discontinued by original supplier. Let us find an alternate source for you or have it made via custom synthesis.

Save you time and money :

- Hunting down items from around the world is time consuming. Let us track down the items for you and propose a quote that includes all the overseas expenses.
- Send one "Purchase Order" for a list of items with multiple vendors. This will keep you from having to generate multiple PO's, and we'll place all the orders together for you under the one PO#.
- Setting up a new account is costly for the purchasing dept. as well as your accounting dept. Keep your vendor list small by using our services.
- Items come in faster through Ryan Scientific as we do a large amount of importation and keep strong relations with our customs house and broker.
